Applicants are requested to update the status of related applications on page one of the specification.

Claim 1 has been cancelled. The active claims are 2-5.

Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to the terms "XXX information device" appeared in the last four paragraphs of claim 2, it is not clear whether it is referring to the device which is being controlled or to the one which is doing the control (see lines 6-7 of the claim). Other claims have similar defects.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 2-5 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-7 of prior U.S. Patent No. 6,728,765. This is a double patenting rejection.

The claims of the instant application and the claims of patent 6,728,765 are directed to an information device system having at least two information devices for communicating with each other via ID numbers and device names, one being controlled

by the other and each having storage for receiving and storing device names and function data.
